Subject: RE: Charles St.

I am saying that we first should define your business needs. If the first priority is to get camera coverage around Charles St., the vendor is saying that it would be cheaper to connect the cameras with fiber - this is the same way we're doing it in our installation. If you want wireless coverage, the area is small enough to use smaller access points that can be installed in the camera housings to reduce the footprint on the poles. One wireless access point in the middle of the large equipment parking area would provide coverage to much of the campus.

I think it would be helpful to understand your goals for this so we can properly address those issues. Perhaps wireless access points could be leveraged along the perimeter, but again it depends on what you're looking for.

Is that clear as mud? :)

Monty

Subject: Charles St.

John,

Brian Magnuson, president of Cascade Networks and our vendor for the wireless mesh network, and I did a site visit at Charles St. last Friday. If you want to put cameras in the parking lots, Brian said it'd be much cheaper for you to run new fiber on the poles like we're using on our project. You can purchase the cameras we're using that already have fiber converters built into the camera housings and bring it back into your existing camera network.

Perhaps it would be good to discuss with you exactly what you want. Now that Brian has seen Charles St., we can more accurately discuss what it would take to accomplish your mission.

Respectfully,
Monty

Paul - I thought I had already sent this to you, but I can't find I did. Unless we already have something in place, I will need to let the Port of Tacoma that we will not meet the 12/15 date. Do we have a pre-existing MOU/MOA with the other regional LE agencies for sharing our resources? I also question the need for a MOU/MOA to be in place for the Wireless Mesh Network project. On the attached PowerPoint, they have marked our project as required. Please advise your thoughts and I apologize for the delay in forwarding.

Subject: PSGP FY08 - Layered Security Requirements

DATE: December 4, 2012
TO: Port of Tacoma PSGP FY-2008 (Round 8) Subrecipients
FROM: Agnes To'oTo'o, Port of Tacoma (Fiduciary Agent)
SUBJECT: **Port of Tacoma DHS Award No. 2008-GB-T8-K065 (Round 8)**
Request for Compliance with Layered Security Requirements

As the Fiduciary Agent for the PSGP FY08, we have determined that a requirement for an agreement concerning the sharing of resources funded by the PSGP may be applicable to your project. Refer to Section 9.5 of the Grant Administration Procedures Manual (GAPM) and pages 23 and 28 of the Program Guidance and Application Kit for the FY-2008 grant program for more information. This subject was also discussed during our November 15, 2012 webinar and we have attached a copy of the PowerPoint slides concerning this matter for your reference.

Please reply with your response to this requirement including your estimated date to execute an agreement, if applicable. If you believe a preexisting agreement(s) addresses the minimum requirements, then please clarify the applicability of the agreement and provide a copy of the document. Lastly, if you believe the requirements concerning the sharing of resources are not applicable to your agency on this grant program, please simply clarify your position on this matter accordingly.

If the Project IJ for your project addresses operational and/or staffing commitments for the investment, then we request your response address this subject as well.

We request your response no later than December 15, 2012.

Please do not hesitate to contact me with any questions you may have on this requirement.

Respectfully,
Agnes To'oto'o

MOU/MOA for Layered Security

- 9. Memorandum of Understanding/Memorandum of Agreement (MOU/MOA) Requirement.** State and local agencies, as well as consortia or associations that are required to provide security services to MTSA regulated facilities pursuant to an AMSP are eligible applicants. However, the security services provided must be addressed in the regulated entities' security plans. A copy of an MOU/MOA with the identified regulated entities will be required prior to funding, and must include an acknowledgement of the security services and roles and responsibilities of all entities involved. This information may be provided using one of the attachment fields within grants.gov. Additional details and a suggested MOU/MOA template may be found in Appendix H.

**Appendix H
MOU/MOA Consortia or Association Guidance**

A. Requirement for State or Local Agencies and for Consortia or Associations.

Entities that are required to provide security services to eligible Ferry System applicants (MTSA regulated facilities) pursuant to an AMSP are eligible applicants for Operational Packages (OPacks) only. In addition, the security services provided must be addressed in the regulated entities' security plan. A copy of a Memorandum of Understanding (MOU) or a Memorandum of Agreement (MOA) between those identified entities will be required prior to funding, and must include an acknowledgement of the security services and roles and responsibility of all entities involved. The MOU/MOA must address the following points:

- The nature of the security that the applicant agrees to supply to the regulated facility (waterside surveillance, increased screening, etc)
- The roles and responsibilities of the facility and the applicant during different MARSEC levels.
- An acknowledgement by the facility that the applicant is part of their facility security plan.

Monty - Address the request to Agnes To'oto'o (Security) and Mike Keim (Contracting) at Port of Tacoma. Be sure to include that the costs were within the Period of Performance of the grant, but prior to the MOA being signed, which is why you are requesting consideration for the charges. Provide as much detail as you can as to what the charges are. I'm more than happy to review the request before you send it. ☺

Hi Teri,

Chief McDonagh spoke to you during your visit with us about asking for the 2008 grant to pay for costs associated with preparing the grant (maps, etc.). You said the grant wouldn't cover that, but that he could submit a request to have this charge reconsidered.

Who would that request go to? I hope this makes sense. If it doesn't, please call me at 206-255-7554.

Thank you!
Monty

Seattle PD Letterhead

Dear Judiciary Agent for Port Security Grant FFY08,

This letter is to formally request compensation under the FFY08 Port Security Grant Program Seattle Wireless Mesh Project for the necessary planning assessment and documentation to apply for funding for the approved project.

The planning costs detailed for reimbursement under this project occurred within the Period of Performance of the grant, but after the release of the FFY 08 grant cycle and before SPD and the Port of Tacoma formally entered into an MOA when the project was approved for funding. This planning was completed specifically for the project and would not have been done if not for the grant project proposal.

This planning was necessary in order to provide the Grant review team, Area Maritime Security Committee and the Captain of the Port a detailed Investment Justification (project proposal), complete with the cutting edge system requirements and capabilities, wireless installation locations and coverage areas, and shortened projected timeline. This Planning information provided a complete and detailed project proposal to the project review committee so they could determine the validity, usefulness and cost benefit of the project.

This detailed planning was done by our senior city information technologies project manager after we were notified the FFY08 Port Security grant program was re-opening project funding requests for new port security requests. The planning information created for the wireless mesh project proposal is currently keeping the project on budget and, with the still weather holding off, on time for installation.

For the above mentioned reasons I am requesting you approve the planning costs associated with this project and listed in the attached document of \$18,080.00.

Respectfully submitted,

A/C P McD

Attached City of Seattle INVOICE # **DMS00526**

Mike McGinn, Mayor
City of Seattle

Mayor McGinn's Senior Team Meetings
Briefing Form – COVER PAGE

1. Project or Issue Title:

Person submitting	Erin Devoto, Erin.Devoto@seattle.gov 233-7937
MO Lead	Ethan Raup
City Department(s) involved	DoIT, SPD, SDOT
Meeting attendees/titles	Erin Devoto, CTO Mark Schmidt, Project Manager, DoIT Dick Reed, Assistant Chief, SPD Paul McDonagh, Assistant Chief, SPD Mary Rutherford, Director, SDOT

2. Problem Statement, or Question to Resolve:

The purpose of this briefing is to provide information about the current City mesh wireless projects, the proposed Metro use of the system along 3rd Avenue, and inform possible decisions about shared use and future expansions of the mesh wireless systems.

3. Action or Decision Needed By: n/a

4. Key Issues or Policy Options:

Issues/Options	Advantages	Disadvantages
SPD received a \$4.87M grant from the U.S Dept of Homeland Security to enhance maritime security and is installing video cameras along the downtown waterfront and other waterways and a mesh wireless network downtown. SDOT received a grant for transit corridor improvements and is installing a mesh wireless mesh network along Rainier Ave. Other departments and agencies (King County Metro) have expressed	SPD and SDOT could leverage excess capacity of their mesh wireless networks to provide services to other City departments and other agencies. This shared use could provide a revenue stream to help SPD and SDOT fund long-term operations and maintenance of their network equipment. There could also be reciprocal shared-use agreements that would allow SPD and SDOT expand their	Will require agreements and/or legislation in place to define terms and conditions of shared use, maintenance and operations procedures, acceptable service levels, fees, etc. System as designed may need policies around video retention and privacy. Opening the networks to shared use (beyond the initial grant scope) will require additional resources (contract labor or FTE's) to administer and operate the network.

Mike McGinn, Mayor
City of Seattle

interested in using the SPD and SDOT mesh wireless networks. Metro would like to begin using SPD's mesh network to support planned transit improvements along 3rd Ave starting as soon as 3Q2013.	coverage using other agencies' networks.	
DoIT recommends that the City develop agreements/legislation and identify resources to enable shared use and programmatic management of mesh wireless networks.		

5. Next Actions and Dates:

Action	Who	Date

6. Project Background, Analysis and Summary:

- Add background information behind this cover page.
- Please be prepared to discuss relevant race and social justice issues and potential unintended impacts of the policy or action.

7. For Internal MO use ONLY:

This briefing approved for Senior Team by: _____

Background

SPD received a \$4.7 M grant through the U.S Department of Homeland Security (DHS) Port Security Grant Program (PSGP). The PSGP provides funding for infrastructure projects to secure port facilities against acts of terrorism. The City accepted the grant funds via Ordinance 123879 in May 2012. SPD is installing 30 video cameras along the downtown waterfront and other waterways to monitor maritime traffic and vehicular traffic entering or leaving port facilities. SPD is also installed a mesh wireless network to provide contiguous, high-speed, broadband wireless coverage from King Street north to Broad Street and from Alaskan Way east to Third Avenue, as illustrated below. The mesh wireless network will give first responders access to video from Port Security cameras and enable two-way exchange of data within coverage areas.

As of 1/10/2013, SPD Port Security equipment has been installed at 85/136 sites. SPD's network is planned to go into production service by 3/31/2013. The project must be complete by 4/30/2013 to comply with the Port Security grant deadline.

Related projects

SPD received a separate, smaller grant through the DHS Buffer Zone Protection Program (BZPP). BZPP grants fund projects that help local law enforcement and first responders mitigate vulnerabilities at high-risk critical infrastructure sites. SPD used Buffer Zone grant funds to purchase and install video cameras and mesh wireless equipment for the four intersections surrounding the Columbia Tower. The equipment was installed and tested during 3Q2012, and will be placed into production service at the same time as the Port Security sites.

SDOT received its own grant to implement transit priority and other technology-based improvements along Rainier Avenue. SDOT has begun work to install the same mesh wireless network equipment at 12 sites and will complete installation during 2013. SDOT and Metro are planning for shared use of SDOT's wireless network; Metro busses and fixed equipment located along Rainier Avenue will use SDOT's mesh wireless network to connect back to Metro's internal data network to support signs that provide real-time bus location and arrival time information, ORCA card readers, and other services for riders.

What Metro wants

Metro wants to use the SDOT-owned mesh wireless network along Rainier Avenue, as noted above. More urgently, rather than build its own network along 3rd Avenue, Metro wants to use the SPD-owned mesh wireless network downtown to support the transit improvements along 3rd Avenue that were publicly announced on 12/11/2012. Metro's project timeline depends upon having a reliable, production service available at its nine planned locations along 3rd Avenue by September 2013.

Issues

1. Agreements and legislation: If we are going to allow shared use, we need memorandums of understanding between departments and/or Interlocal agreements between agencies that define terms and conditions, roles and responsibilities, maintenance procedures, service levels, fees, etc.
2. Service support: The Port Security equipment was purchased with a three-year extended warranty. The original service support model for the Port Security network assumed that SPD and SFD would be the only users of the system, and that SPD could directly support the limited number of users (including dispatching the vendor to make warranty repairs, when necessary). If other departments and/or agencies are allowed to use the mesh wireless network, there will be a much larger number of users to support and higher service level expectations. The original, planned support model (SPD

personnel take trouble calls and work with the vendor to resolve issues) will not scale to meet the requirements of multiple different departments and agencies.

3. Future growth: Departments and agencies that plan to use the mesh network want as much network coverage as possible. If the mesh wireless network is shared by multiple departments and agencies, various departments and agencies could offer funds from various sources to fund future expansion projects. The City should decide now if it will plan and programmatically manage growth (identify priority areas for expansion, etc.), or simply allow growth to happen piecemeal. If growth will be managed programmatically, resources need to be assigned to the program.
4. Public communications: We need to be prepared to answer questions from the media and public about the Port Security network (video cameras, especially, but also the mesh wireless network). SPD plans to begin a public communications campaign in January.

Subject: 3rd ave
Attachments: Mesh Wireless Briefing 01-11-2013.docx

Ethan: We met last Friday to discuss what the issues are with expanding the use of our current mesh wireless on 3rd Ave to Metro. Attached is the briefing paper. Long story short.....we need the executive to give us direction on how to manage this system long term. We also need to figure out what we need to do between now and Sept to help Metro start using our system by September if this is in fact what someone wants us to do. The system wasn't designed to add another agency- it's a SPD system built by DoIT. If we are to add Metro, we will need additional staffing to operate the system.

One department needs to be the lead on this – probably DoIT although if anyone else wants it please speak up!

When you return let's discuss – or do you want me to talk to Julie in the interim?

Thank you.

Subject: FW: HLS Grants Status

Paul:

It appears that you have several grants that will be expiring within the next couple of months and over \$2 million worth of purchases to process. I want to alert you that there are a number of staffing transitions occurring in Fiscal, and that your 1.5 requests must be approved and in the Fiscal Office by April 1st to ensure that the purchases can be processed in time to charge the grants. For the grants ending April 30th, depending on whether or not the vendor has a contract with the City, it may be too late to process the requests.

Ideally, Fiscal should receive all requests for grant purchases at least 2 months before a grant expires.

Please let me know what I can do to assist you in meeting the April 1st deadline.

Thank you in advance.

Subject: Wireless cameras

Hello man, Jon with KOMO here.

We came across some documents that expand on how the wireless cameras are set up. It appears some of the cameras can be accessed from mobile SPD cars. Does the Mayor have any thoughts on the security of the system or concerns of hacking?

The information we're looking to confirm comes from :

<http://www2.seattle.gov/purchasing/vendorcontracts/BVCDetail.asp?rptid=250&SortMode=3&ReportOption=0&cid=0000002996&sr1=2&sr2=2>

Also attached are a network coverage map, diagram and on page 55 of the RFP-the larger system of connection. Is this accurate and is some of this in place?

The diagram is what's interesting and shows how many people can look at the cams and their data. Also says this shouldn't be publicly accessible

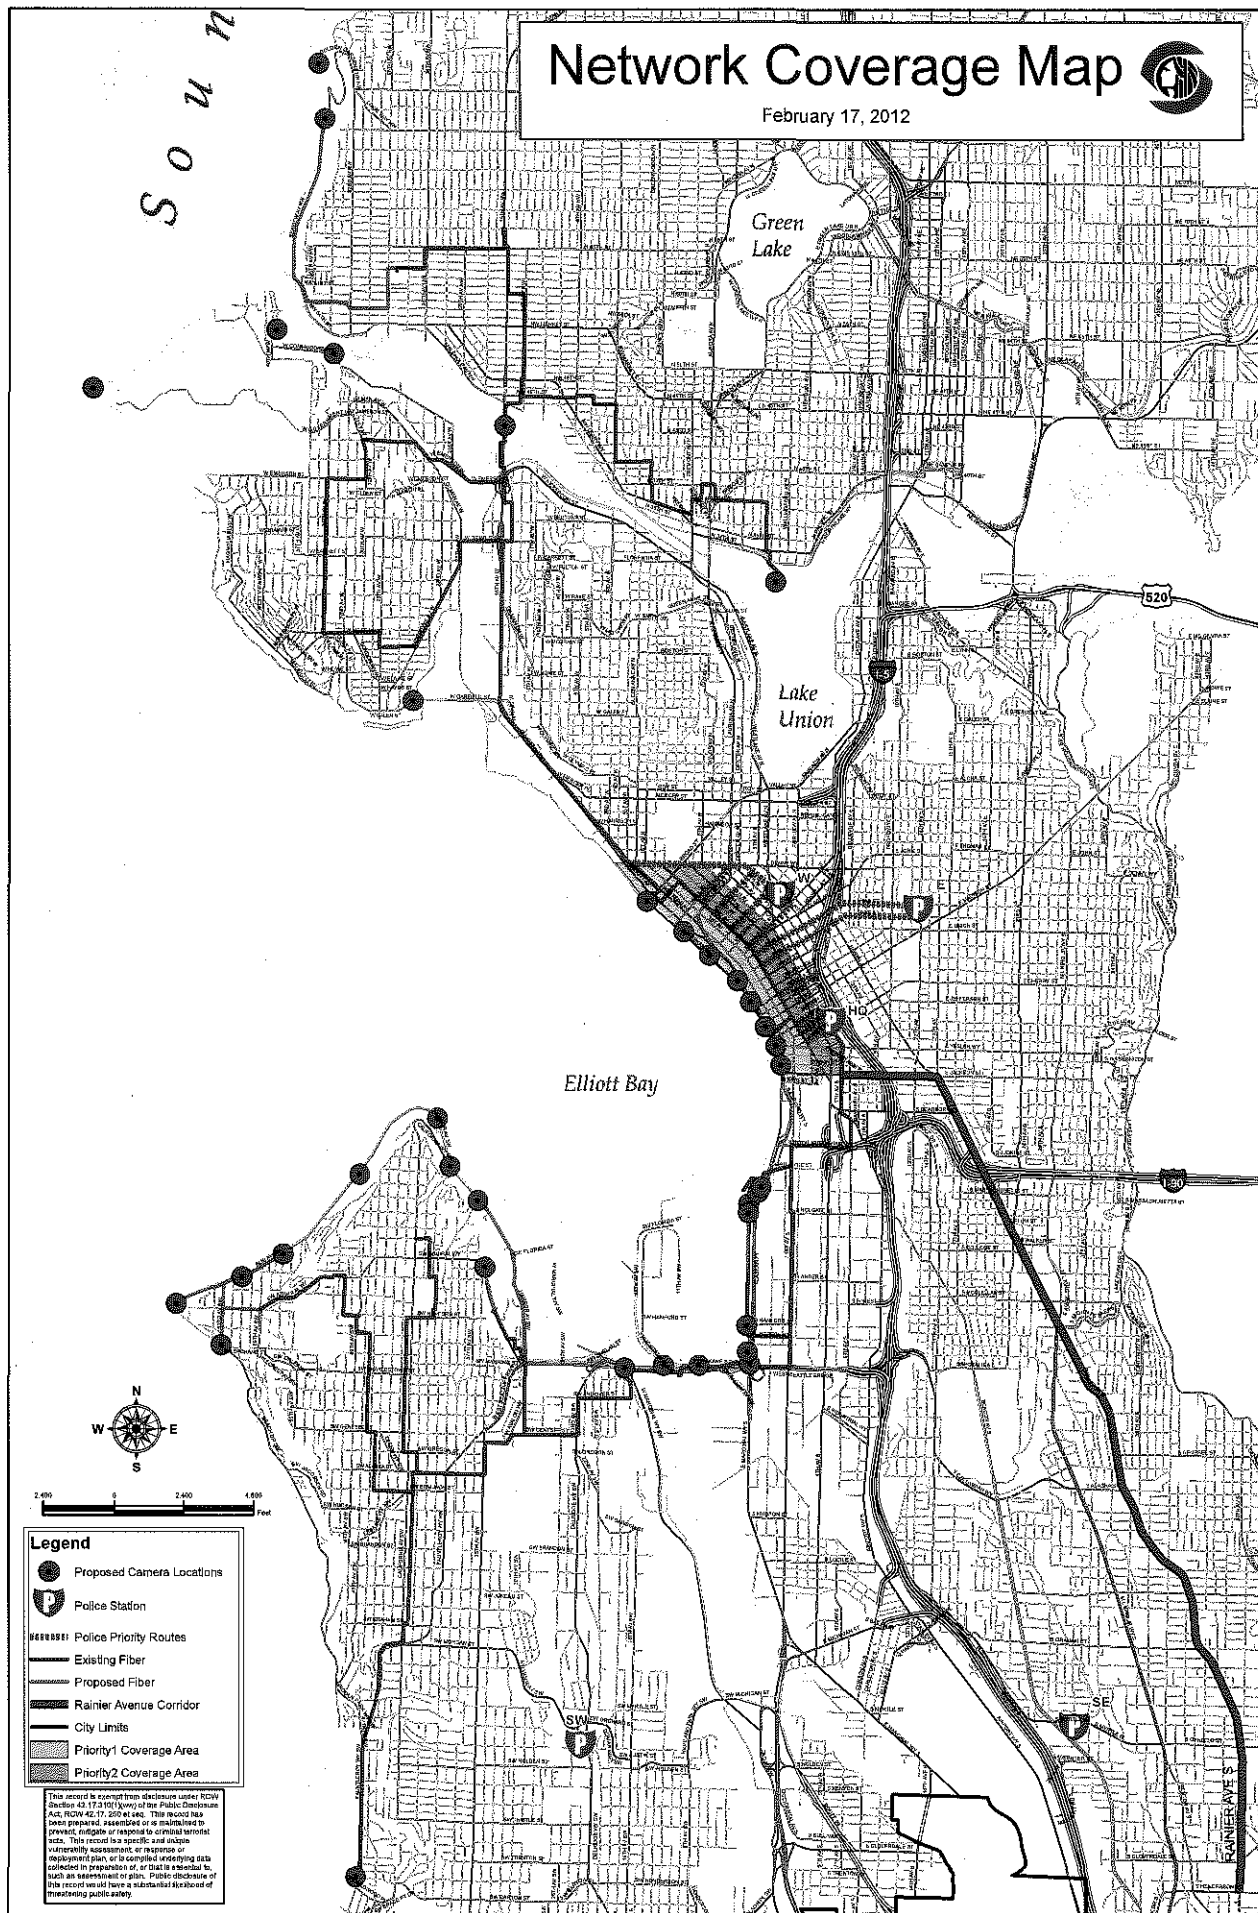

Thanks so much.

Jon

The mayor asked me to share this statement before I give it to a few reporters who have inquired about the mesh program.

Please let us know if you see any issues with the following:

"I've directed the Seattle Police Department to brief any community groups or media interested in the port security system. The system will not be operated until a thorough public vetting of the system has been completed and the public has provided input. I will also be seeking input from other partners and beneficiaries of the system, including the Port, Coast Guard, fire department, and other public safety and transportation agencies, before any operational decisions are made."

Subject: SDoT IA - Amendment

Brian,

I just realized we need to amend the current IA for the PS Mesh Project. I will take care of this, extending the date out until April 30, 2013. This is the close of the grant, so no expenses can be incurred past this date and be paid for by the grant. I wanted to review where we are standing with the original budget just to make sure nothing needs to also be modified here. This amendment will take place, so please continue with the installation work while I put this amendment together. If you have questions, let me know.

Thanks,
Chris

Hi Assistant Chief McDonagh,

Councilmember Harrell is requesting SPD provide a briefing on the Municipal Mesh Net Project and surveillance cameras in the Alki neighborhood at the Public Safety committee meeting on Wednesday, 2/20/13. The agenda item will be at the top of the agenda at 2pm and depending on public testimony, discussion will most likely begin around 2:15/2:20 pm. Please confirm if SPD can present at the 2/20 Public Safety committee meeting. The committee is requesting a power point presentation and related documents on the cameras to be sent to the committee by Tuesday, 2/19. Please let me know who will represent SPD at the briefing. Thank you.

Subject: Municipal Mesh Net Project Questions (Councilmember Bruce Harrell)

Hi Monty,

By way of introduction, my name is Vinh Tang, legislative assistant to Councilmember Bruce Harrell. I have a few questions regarding the 30 cameras installed as part of the municipal mesh net project. I have reviewed the briefing you provided and posted online at <http://spdblotter.seattle.gov/2013/02/04/privacy-concerns-black-bars-and-seattles-municipal-mesh-net-project/>.

Are all 30 cameras installed on city light poles on SDOT's public right of way?

Are any of the cameras installed on Seattle city parks?

The cameras and related equipment are the property of which agency?

Which city department is authorized to use the cameras for live monitoring, system training, testing, maintenance, or repair.

Thank you.

Vinh Tang

Cpt Fowler,

I have a doctor appointment I need to attend that morning in Everett. Rebecca and I talked and she is confident she can present fine without me. She'll have James DeVaney (Blauer rep) at her disposal via cell phone as well in case there are any technical questions. I have full faith that Rebecca will be convincing and get them to approve the improved Blauer chemical protective suit.

Thanks Captain.

Sean,

The chart below is the final price proposal taken from the Contract on the security camera system. I'm researching a few questions on this for a followup story. Here are are:

1. since project elements have changed (3 FLIR cams, not 6, for example) - what is the ACTUAL amount already spent for each of the line items/categories in this chart? (below)
2. can you provide a copy of the actual PSGP08 Grant Application proposal by City of Seattle and the grant award docs, for the total \$4,874,705 grant?

Thank you,
Matt

Here's the detail budget per contract - what are the "Actual spending to-date" on each line item? Can your project manager run a report on this?

Chief,

Please see below the message that I plan to send to Beth today. I put this together with the assistance of Lt. O'Quinn. Please let me know if you have any edits, or if it is okay to send. As you know, we need to get this off today. Thanks very much.

Beth,

Please see below our inventory of cameras that meet the definition of "Surveillance." For the committee, our staff representatives will be myself, Acting Capt. Chris Fowler and Acting Lt. Verner O'Quin. I will be at every meeting, but may be accompanied by either Capt. Fowler or Lt. O'Quin depending on their availability.

We are currently working on the mesh network policies and hope to soon have a draft for the committee. We hope to lock down the format and ensure that we are capturing all the right information before we begin developing policies on the other camera systems below. I will look forward to your meeting request (please send to all three of us). Please let me know if you have any questions. Thanks.

1. **Thermal** We have one long range camera with thermal capability. It would be used to see 3 to 4 miles into the Puget Sound for ships for rescue, any waterborne incident. We are trying to find a location for this camera. We hope to put it on top of one of the buildings in downtown Seattle.
2. **Mesh Network** There are up to 30 cameras (VB-M40 and VB-H41 cameras). These cameras are mounted on City infrastructure (e.g. city light poles and bridges) and used to enhance the security around the waterways of Seattle.
3. **Special Event & Nuisance Abatement** Expanding & retracting vertical cameras called Sky Watch, 5 overt portable cameras and reconyx cameras. The nuisance cameras are used to

surveil potential criminal activity that may be active when officers are not present (e.g. graffiti). Or, used for civil abatement. For example, to monitor night clubs or other venues that are creating issues for the surrounding community.

4. **Command Vehicles** - Two cameras on the vehicle and five portable cameras in the vehicles. Used in exigent circumstances for situational awareness. For example, SWAT call outs or response to emergency situations like CBRNE (Chemical Biological Radiological Nuclear Explosive). These cameras are also used during special events like Torchlight, the hydro races and the 4th of July.

Subject: POINT OF CLARIFICATION: Surveillance Equipment Ordinance Follow-up

Many thanks for your assistance thus far.

To clarify, only those departments *with* cameras need to have a representative on the working group.

Thank you.

Subject: Surveillance Equipment Ordinance Follow-up

Greetings Cabinet Directors,

On Monday the City Council passed legislation governing the use and acquisition of "surveillance equipment."

For the purposes of the ordinance, surveillance equipment means equipment capable of capturing or recording images, videos, photographs or audio of individuals on public or private property, regardless of whether "masking" or other technology might be used to obscure or prevent the equipment from capturing certain views.

Surveillance equipment does not include a handheld or body-worn device, a camera installed in or on a police vehicle, a camera installed in or on any vehicle or along a public right-of-way intended to record traffic patterns and/or traffic violations, a camera intended to record activity inside or at the entrances to City buildings for security purposes, or a camera installed to monitor and protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

I am asking every City department to review their technology assets to identify any surveillance equipment (as defined above). Additionally, identify a staff person from your department to serve on a working group we are developing. Please reply to this email with a preliminary list of surveillance equipment that your department owns, operates or plans to acquire, along with the name of the staff person assigned to the working group, by Friday, March 22nd.

Many thanks,
Beth

McDonagh, Paul

From: Eder, Dan
Sent: Friday, March 22, 2013 3:55 PM
To: Doss, Greg
Cc: Kimerer, Clark; McDonagh, Paul
Subject: RE: protocols

Thanks, Greg. I know that I would benefit from a sit down with appropriate parties to understand what the wire mesh network even is and how the cameras fit in. That kind of a basic info meeting would probably be helpful as a first step. It would give me some background for understanding whatever you all are planning with respect to protocols. If you are willing to organize that kind of initial meeting perhaps as early as next week, I'd sure appreciate it.

Subject: RE: protocols

Dan,

Yes, I believe that the Wireless Mesh / Port cameras are the first priority for the Department. That said, I have not been advised of any other systems that we may be currently running and that will require reporting in the near term.

I will check with Chief McDonagh to see 1) who is preparing the Port camera protocols and where they are in the development process; and 2) if we have any other systems that we need to report. At this time, I know of none.

I'll get back with you when I have a better idea of where we are on these questions. At that point, we can meet to discuss how best to approach the Council. I am also working to identify all the players for the requested briefing with CM O'Brien. I hope to be back shortly with you on all these questions. Thanks very much.

Subject: protocols

Hi Greg. Following Council's action Monday re: protocols for some surveillance equipment, I'm writing to check in regarding timing of developing protocols for the Port Security cameras (and if applicable any other protocols related to the broader Port Security Mesh Network).

It would be helpful for me to meet with you and anyone else to learn more about the network, the cameras, timing / schedule constraints, etc.

Even if there are other systems for which you will be proposing protocols, am I right in assuming that the federal grant funding issues make the Port Security cameras first in line for protocols?

Thanks.
- Dan

Subject: FW: PSGP08 - Grant Period Reduction Notification

All,

If I sent this yesterday, you might not have believed me. Apparently, POT has extended Wireless Mesh Network performance period until June 13. I think the sooner we finish the better, but if needed we have the time.

Thanks,
Chris

Chris – Correct due to scope of your project and current events we felt it necessary to allow SPD additional time. However by all means if you can complete the project by the end of this month please do so. It was more of a courtesy extension. Let me know if you have any additional questions.

Have a nice day

Agnes,

SPD's current contract expires on April 30, but if I understand the attached, we have until June 13 to complete. Just want to clarify.

Thanks
Chris
